

EDUCATION

Year	Degree/Certificate	Institute	GPA
2023-2027	B.Tech CSE(AIML)	Dronacharya College of Engineering	8.0
2023	Class XII (Senior Secondary)	Govt Model Sanskriti Sr Sec School	7.9
2021	Class X (Secondary)	Govt Model Sanskriti Sr Sec School	9.5

EXPERIENCE

- Ullas Trust

June 2025 – July 2025

Data Intern

Hybrid

– Prepared a unified master dataset for seamless processing of 10,000+ records by extracting and consolidating raw inputs from disparate Excel and CSV sources.

– Ensured 100% data quality and eliminated reporting errors for downstream analysis by executing rigorous data sanitization and schema normalization using Python (Pandas).

– Restored data distribution integrity across 15% of the dataset by implementing statistical imputation techniques, such as mean/median substitution, to address missing values.

– Identified the top 3 areas for program improvement by processing and categorizing over 5,000 survey records using advanced Excel functions like Pivot Tables and VLOOKUP.

PROJECTS

- PayPal Global Transaction Analytics

Feb 2026

SQL (Window Functions, CTEs, Subqueries, Joins), Time-Series Analysis, Risk Analytics

– Engineered robust SQL pipelines to analyze global transaction flows across 5 normalized tables, identifying top-performing international markets and the top 10 tier-1 merchants using complex multi-table Joins and aggregate functions.

– Delivered targeted risk and user segmentation metrics, including the identification of high-value cross-border transactions (> \$10,000) and consistently engaged users, by implementing advanced Window Functions and nested Subqueries.

– Automated merchant performance scoring and comprehensive financial reporting spanning a 12-month period by executing time-series analysis and dynamic categorization utilizing Temporary Tables and conditional logic.
- India CPI Inflation Analysis

Jan 2026

MS Excel, Power BI, DAX, Power Query, Time-Series Analysis, Risk Analysis

– Processed 7 years of CPI inflation data (2017–2023) across 7 main categories and 30+ sub-categories to compute monthly contribution percentages by building robust data pipelines using Excel and Power Query.

– Identified major drivers of abnormal inflation spikes, specifically noting a >45% surge in non-food categories in Dec 2023, by applying time-series trend and risk analysis.

– Delivered data-driven policy insights on urban vs. rural YoY fluctuations by developing an interactive hybrid dashboard with 15+ visualizations, utilizing Excel Pivot Tables,Power BI, and DAX KPI modeling.
- Compliance Seva (Legal Metrology Analytics)

Aug 2025 – Sep 2025

OCR, NLP, SQL, Power BI, Data Validation, Anomaly Detection, Root Cause Analysis, ETL Pipelines

– Developed an analytics system using OCR and NLP to process unstructured product labels and automate compliance checks.

– Built real-time dashboards to monitor violation trends and applied rule-based anomaly detection to flag abnormal patterns.

– Implemented ETL pipelines to validate extracted data and performed root cause analysis on recurring compliance failures.

TECHNICAL SKILLS

- Data Analytics & BI:SQL, Advanced Excel, Power BI, Tableau, Google Data Studio, DAX
- Programming Languages:Python (Pandas, NumPy, Matplotlib, Seaborn), R programming
- Data Management:Data Cleaning, Data Extraction, EDA, Data Mining, MySQL
- Soft Skills:Problem Solving, Critical Thinking, Communication, Attention to Detail

LEADERSHIP AND AWARDS

- Hackathon Winner – Park Prabandh (2026): Won 1st Prize for developing an Agentic AI smart parking system (organized by Google Developer Student Clubs, DCE).
- FAER Scholar (2025 – 2026): Awarded this prestigious cohort position in recognition of proposing and building innovative, high-impact AI solutions.
- Hackathon Finalist (2025): Achieved top finalist status at both Chandigarh University and “Hack Genesis”.
- Vice Chair – ACM-W Chapter (2024 – 2025): Orchestrated technical events, coding workshops, and peer mentoring sessions. Actively guided students in tech and successfully drove a 35% increase in female participation within the chapter.
- Higher Education Scholar – Ullas Trust (2023 – 2027): Mentored 100+ students by breaking down complex STEM and AI fundamentals into accessible lessons.
